## Research and Development Team

## KOICA Research and Development Team

KOICA Research and Development Team is playing a significant role as an extensive platform for policy development and knowledge sharing on development cooperation. Korea, member country of the OECD DAC, has led the discussions on global development and consolidated its position amongst the global community by successfully hosting the Busan HLF-4 in November 2011 and contributing to the establishment of the Busan Global Partnership. In keeping with Korea's heightened status in global development cooperation, Research and Development Team is seeking to draw up measures for the betterment of development cooperation on the basis of Korea's strong point, which is social and economic development experience. Furthermore, based on the expertise obtained from KOICA's experiences in practice as the representative expert organization on grant aid in Korea, KOICA Research and Development Team conducts creation and sharing of high added-value knowledge on development cooperation. Based on the lessons learned from KOICA's experience, KOICA Research and Development Team will continue to make commitment to the development of our partner countries and at the same time, promotion of development cooperation effectiveness by providing practical policy recommendations consistent with the partner countries' environment and current states.

## KOICA Four Year Research Goals

## Four Priority Research Areas

## Main Area 1 Creation of High Added-Value Knowledge as a Platform for Development Cooperation

- Research activities considering knowledge demands from various stakeholders both at home and abroad
- Proactive research on changing diverse issues on 4 priority research areas
- Research to build foundation of logical evidence for establishing policies and strategies, and various decision-making processes on development cooperation
- Research to support on building a scientific performance system for KOICA's programs and strengthening expertise
- Research for the development of innovative and creative development cooperation program models
- Production and management of quality data on development cooperation to promote aid transparency through the Data Revolution

## Main Area 2 Sharing Knowledge as an Expertise Hub for ODA and Development Cooperation

### Host of Events and Seminars to Share Research Outcomes

- 'Seoul ODA Conference' (Annually)
- 'Development Cooperation Forum' (Quarterly)

### Knowledge Expansion through Building Foundation for e-Knowledge Service

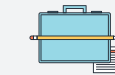

- Sending 'ODA research newsletters' via SNS and email service
- Strengthening web-based service for knowledge sharing through partnership with academic and search engines

## Main Area 3 Promotion of Research Capacity through Strengthening Partnership with Local and Global Research Institutions

### Joint Research through Global Partnerships

- KOICA-UNRISD Joint Research (2012~2014)
- KOICA-WIDER Joint Research (2013~)
- KOICA-JICA-RI Joint Research (2014)

### Promotion of Academic Research Capacity

- Supporting KAIDEC's research activities and programs (2011~)

### Supports for Capacity Development of New Researchers in Developing Countries

- 'KOICA-GDN Research Development Awards' in collaboration with the Global Development Network (GDN) (2014~2015)
